Property Description

Fulfill all your senses! Gaze out to the dense, lush jungle from your open-air living room; listen to Tucans and Howler Monkeys call to each other; feel the cool mountain breeze on your skin after a hot day at the beach; smell the night blooming Jasmin growing in your yard; taste perfection from your own fruit trees. If you value privacy for your family, fertile soil to grow your food, protected jungle for Costa Rica's animals and fresh water to play in then you should see this unique property in the mountains. This 7-acre parcel is located in the UNESCO Savegre Biosphere Reserve and is part of a large biological corridor. A year round river borders the property. There are several additional building sites, either along the river or on a hillside, for added rental income potential. The parcel is also perfect for horses, additional gardens and orchards. The 2 bedroom cabin sits on high on the property, allowing for protected views of jungle covered mountains and the river below.
