- Pool

Property Description

This unique, three-level four bedroom home boasts some of the most dramatic views available in the area. The viewscape is breathtaking and includes rocky headlands, the world-famous Whale's Tail rock reef, Caño Island, the Osa Peninsula and even sunset on the water during the summer months. The elevation is approx 1000 feet above sea level which gives the site a lofty feel, offers more moderate temperatures but still puts you within a five minute drive to the coastal highway. The turn-off point from the coastal highway is about halfway between the center of Uvita and the town of Dominical, making the location not only very desirable but also very convenient. The house itself has been a full time residence but also lends itself to vacation rentals given the bedroom count, generous outdoor living areas, swimming pool and landscaped gardens which invite toucans and monkeys daily. The lower level features an independent two bedroom apartment.
